Task 2

(1)

```
## Call:
## ergm(formula = glasgow_net1 ~ edges + nodematch("gender"))
##
## Maximum Likelihood Results:
##
##                  Estimate Std. Error MCMC % z value Pr(>|z|)
## edges             -5.0133     0.1365      0  -36.72   <1e-04 ***
## nodematch.gender   2.0098     0.1460      0   13.77   <1e-04 ***
## ---
## Signif. codes:  0 '***' 0.001 '**' 0.01 '*' 0.05 '.' 0.1 ' ' 1
##
##      Null Deviance: 22890  on 16512  degrees of freedom
##  Residual Deviance:  3824  on 16510  degrees of freedom
##
## AIC: 3828  BIC: 3843  (Smaller is better. MC Std. Err. = 0)
```

- Negative (and significant) edge coefficient - networks tend to be sparse
- Positive (and significant) homophily coefficient - networks tend to have homophily

```
## Conditional probability of a tie between same-gender students: 0.04726488
```

```

From the lags we see that the model explores the state space very well, since autocorrelation becomes very close to 0.

```

From the summary table we see that the p-values are high (not all of them are significant on the 5%) level. This also indicates that the model fits well based on the statistics that it is trained on.

edge−wise shared partners

Plotting the auxiliary statistics shows us that the model explores networks with similar in- and out-degree distributions, but the explored networks are much less connected than the reference one. This can be seen in the `distance` and `espartners` diagrams.

```

- i - reciprocity is supported by data
- ii - transitivity (gwesp.OTP.fixed.0.1) is supported by the data
- iii, iv - cannot tell as the coefficients are insignificant
- v - the opposite is supported
- vi - supported
- vii - supported (negative coefficients, so the abs difference should be small)

(6)

????

(7)

- **H1** - children with similar literacy scores tend to become friends (literacy score homophily)
- **H2** - Girls tend to receive more friend nominations than they send
- **H3 (a bit unsure about this one)** - alcohol homophily is more prevalent in boys compared to girls
